Test and Vision Inspection Machine

A test and vision inspection system integrated into a single machine platform, running simultaneously to ease and minimize handling of products in between test processes, reducing errors and saving floor space.

This machine performs 4 different types of test (Optical, Electrical, Uniformity, Photodiode) and 6 sided vision inspections on a wide scope of common market flash lens and photo sensors.

Machine Features

- **2-in-1 Machine**
Test and Vision inspection system integrated into a single machine reducing production floor space
- **Simultaneous Testing**
Minimize handling of products between test processes, improving time efficiency and reducing errors
- **Designed to handle small and sensitive unit**
Products such as LED flash lens, and photo sensors
- **LED Flash Module Test**
Uniformity, Electrical, Optical, Photodiode
- **6S Vision Inspection**
Cosmetic check on 6 sides (top, bottom, front, back and sides)
- **Optional Output: Tape and Reel**
Besides tray support, machine is capable of T&R as needed

Machine Specification

Products	LED flash lens, photo sensors	
Specifications	Input:	Tray magazine
	Output:	Tray magazine, Tape & Reel
Tests	Uniformity, Electrical, Optical, Photodiode	
Vision Inspection	6S (top, bottom, front, back and sides)	
UPH	3500 (600ms test time)	
Footprint	2800mm (W) x 2800mm (L) x 2020mm (H)	
Weight	4000 kg	
Warranty	1 year limited excluding wear and tear parts	

Applicable Products

Wide range of LED flash lens

Phone Camera Sensors

Other Products

SLD 001
Laser Diode Tester

AT 100
COB LED Test Machine

EOL Tester
Automotive EOL Machine

RT 800
Reliability Test System
